

Submitter: Teresa Rapp

On Behalf Of:

Committee: House Committee On Housing and Homelessness

Measure: HB3501

House Members: I would like to submit that letting our state be destroyed by people with drug/mental problems, and those who cannot afford housing in our great state is unacceptable. Don't you think we could better serve them with residential mental health/treatment centers? Possibly an updated mandatory facility like Dammasch Hospital or perhaps a facility where the patients could learn how to farm and earn privileges for the growth in learning how to assist with their own survival? Away from the chaos of the city, possibly in a lower residential area such as Antelope, OR? Or somewhere like that. The help they are getting now is NOT working! No punishment, numerous rewards, the "right" to DESTROY everything the majority have worked their whole lives trying to improve and beautify. This is not acceptable.

Unsustainable, embarrassing, a fool's fantasy. Where will the line be drawn? People that have chosen to vote this direction should be absolutely, legally bound to accept these individuals into their private homes! Maybe then they would understand rules and consequences! Please consider the reality of the asinine reality you are pushing down our throats.
