

Submitter: Jason Keim
On Behalf Of: Rose City Moving
Committee: Joint Committee On Transportation
Measure: HB2098

Rose City Moving & Storage has been an Oregon company for over 40 years. For all of those 40+ years the current I-5 bridge has been an issue for transporting goods around the Portland area. Even when not going into Washington there is still backups that are miles long into Oregon, costing people money as trucks sit idling on the freeway. The current bridge needs to be replaced by one that is not only safer but more environmentally friendly due to not having thousands of cars and trucks a day sit idling while bridge lifts occur. Please fund the bridge replacement.
