

I pay taxes to the state of Oregon so I may enjoy the public spaces. When a homeless individual erects a home and blocks my passage on a public land, I can no longer enjoy this space. Also, it is not safe for me when a homeless, drug addict erects their home on public space and interferes with my security and peace of mind. My husband and I were attacked by a homeless drug addict, which was reported to the police and a citation was issued to the individual, so I have experienced this threat on a personal level.
