

Submitter: Joe Rowe
On Behalf Of: na
Committee: Joint Committee On Transportation
Measure: HB2098

I oppose HB2009 and all current amendments. If you must amend it go with rep Pham amendment. Rep Pham suggests the 3.4 billion cost of construction and 400k loan. Then on the floor vote please vote no on this HB unless it is converted to fund only public transit and only earthquake upgrades for the existing bridges and the BNSF fix in the video below. Please watch my youtube video with evidence about ways we can spend this money on rail and fixing the BNSF bridge that parallels the IBRP
