

Submitter: Laura Feldman  
On Behalf Of:  
Committee: Joint Committee On Transportation  
Measure: HB2098

A bridge that fits!

Not an overwrought car pollution structure that will literally kill people in already burdened areas like mine, North Portland.

I really can't believe how backward Oregon has become in terms of climate justice. It's really embarassaing.

Fossil fuels are going away. The state has no way to pay for this bridge enlargement plus the freeway expansion.

What utter folly.

Laura Feldman
