

Caring for Our Community

La Clinica is expanding acute care services to meet our community's demand for urgent care services while reducing the overall cost of care and improving the Rogue Valley's capacity to respond to infectious disease outbreaks and other emergencies.

Project Overview:

- ◆ Remodel a 2,728-square-foot clinic to add a processing lab and retail pharmacy with drive-up capabilities.
- ◆ Build a new 7,038-square-foot clinic to house 12 exam rooms, x-ray services, a nurse triage room, and a procedure room with ultrasound services.
- ◆ To prevent airborne infections and increase disaster preparedness capabilities, two exam rooms will have dedicated HVAC systems and heavy duty exhaust fans.
- ◆ The total cost of this project, including construction, renovation, site improvements, equipment, and supplies, is \$4,400,000.

**La Clinica
is a Rogue
Valley
success
story.**

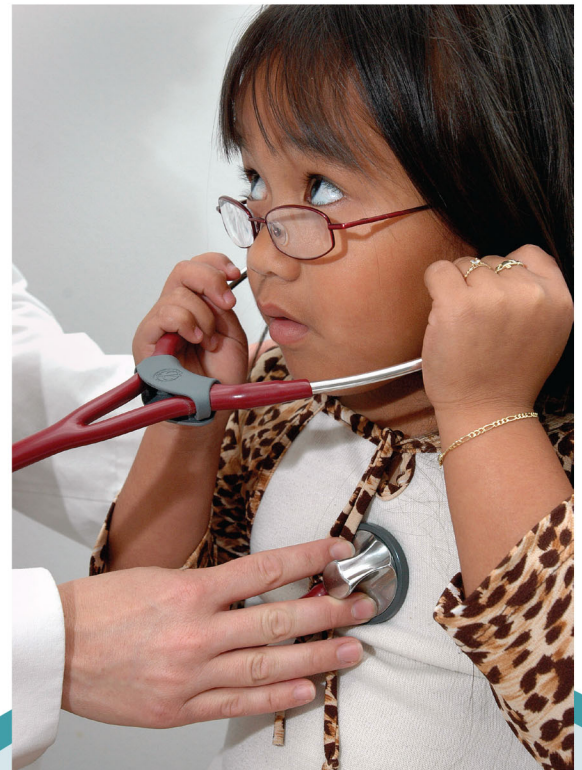

Serving southern Oregon since 1989, La Clinica is a flourishing, multidimensional healthcare organization that serves more than 30,000 adults, children, and families a year. A regionally acclaimed organization, La Clinica is known for its exponential growth, service innovation, and community engagement.

The time is now to support La Clinica as it evolves to maximize its capacities to meet the greatest healthcare needs in our community.

Expanding La Clinica’s Acute Care Clinic will benefit our community

- 1 Help prepare Jackson County to respond to future COVID-19 outbreaks as well as other infectious diseases.
- 2 Provide an affordable alternative to emergency department visits to reduce overall costs and prevent large medical care debt.
- 3 Provide more same-day, walk-in appointments for working patients who cannot easily access care.
- 4 Provide x-ray and ultrasound diagnostic services at an affordable price.
- 5 Provide care to residents of nearby emergency housing shelters.
- 6 Provide an easy entry point to access mental health, substance use disorder, dental health, and wellness services at La Clinica.

Project Budget

EXPENSES	AMOUNT
Administrative and legal	175,000
Architectural and engineering	195,000
Permitting and code compliance	25,000
Construction, including site work	2,450,000
Equipment and supplies	950,000
Contingency	605,000
Total Project Cost	\$4,400,000

Project Goals

- 1 Raise \$4,400,000 to fund the Caring for our Community Campaign.
- 2 Open the Acute Care Clinic expansion by June 2024.
- 3 Serve 5,000 patients a year at the Acute Care Clinic in the 2025 service year.

Building on our promise

In the late 1980s, La Clinica’s founders were inspired to open a health center by stories of agricultural workers who relied on costly hospital services for all their healthcare needs. They delivered their children without prenatal care and put off seeking professional medical services because of cost, suffering needlessly.

Today, La Clinica operates 29 service sites and is the healthcare home for more than 30,000 patients. Community members have access to medical and dental care, mental health services, treatment for substance use disorder, prenatal and gynecology services, pharmacy, physical therapy, acupuncture, grief counseling through WinterSpring grief education and support program, movement, nutrition, and cooking classes, and health, workforce, and personal development classes and workshops.

La Clinica is a good investment

Since opening nearly 35 years ago, La Clinica has grown exponentially to serve one of our community’s greatest needs: affordable health care.

In the last 20 years, La Clinica has achieved remarkable successes:

- ◆ Opened 23 new service sites in high-poverty neighborhoods and schools throughout the county.
- ◆ Expanded services to include dental, mental health, substance use disorder, physical therapy, and more.
- ◆ Introduced services in the community to reach the most vulnerable, including a dental health prevention program that serves 15,000 children in high-poverty schools and the Mobile Health Center, a clinic on wheels, that visits homeless shelters and service providers.

La Clinica is a strong economic engine—our growth is good for our community and saves healthcare dollars

Health centers like La Clinica save \$2,300 a year for every Medicaid patient served. This equals a savings of \$37,208,103 in 2021 directly attributable to La Clinica’s services. In addition, researchers found that Medicaid patients at community health centers have significantly reduced likelihood of hospitalizations and emergency room visits for non-emergency issues.

La Clinica stimulates economic growth in our region. In 2021, La Clinica produced \$111,998,226 in economic impact (based on a multiplier of 2.9).
