

Submitter: Leonard Jensen

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: HB2426

Please give us a chance to pump our own fuel as all other states permit. This will shorten our wait times fueling. No more spilled gas on our cars paint. No more improper fuels added by mistake. No more dents in the side of our vehicles because they missed the fueling hole. No more waiting for someone to come off break to remove the nozzle from the car. Let us do what almost everyone else in the country is allowed to do! Thank you! By the way, I am 72 years old and have no problem doing this for myself.
