

Submitter: Patrick Speer

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2756

Hall Blvd is a Orphan Highway desperately in need of a Parent. It is a safety hazard for all modes and users.

It Lacks sufficient lighting, sidewalks or crosswalks for pedestrians. The bike lanes are a mess and full of debris and blind corners and is shared with pedestrians due to lack of sidewalk facilities. Wheelchair users are frequently having to navigate a mix of bike lane, sidewalk and in street movements to get to destinations near by.

Drivers go faster then the posted speed of 30mph due to the lack of design change to slow them down, they continue to go the speed that "feels right" due to lack of Traffic calming.

This area is primed to have walkable community it just needs the facilities. It needs a parent that cares about more then funneling cars.
