

Submitter: Aimee Marciniak  
On Behalf Of:  
Committee: Senate Committee On Rules  
Measure: SB85

Please continue to do the necessary work towards closing loopholes in CAFO regulations that allow large-scale factory farms to destroy the health of our land, water, air, health and communities in rural Oregon.

As a small-scale farmer, worker hard to regenerate land and revive scale-appropriate farming practices and high-quality food to the Lebanon, Albany & Corvallis communities, this issue is extremely important to our farm, as well as the 100 families that support us by purchasing their dairy and beef from us.

While not perfect, the -4 amendment is a step in the right direction to protect communities from the negative impact of industrial farms, like the poultry operations seeking to site next to our homes, schools, churches, rivers and creeks.

Please vote yes on -4 and pass it out of committee. Thank you.
