To: Co-Chair Sen. Elizabeth Steiner

From: Mitzi Hurt

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do, and for the opportunity to submit my comments.

Sincerely,

Mitzi Hurt  
OSEA Member, Portland, Ore.

- Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do, and for the opportunity to submit my comments.

Sincerely,

Mitzi Hurt  
OSEA Member, Portland, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Tami Mattison  
OSEA Member, Salem, Ore.

### **I support quality education for all Oregon students**

Esteemed colleague,

Below is a template that you've already seen many times. It states the specifics of the bills I'm asking you to support. But before you read that, I'm asking that you consider our children's education and, inherently, support and training of the people working most closely with those children, as paramount to the foundation of a healthy society. The divisions we have seen in our country and our state are a direct result of a lack of educated thinking. I don't mean that people should have the same politics as I do, but this abhorrent and viral spread of misinformation, could be mitigated by people learning how to *\*think\** critically. Among so many documented benefits of quality education are the ability to stretch one's mind, to embrace new ideas, and to make rational judgments rather than reactionary, fearful ones. I thank you sincerely for considering enhancing all aspects of support for educating ALL Oregonians. Please continue to read the letter below.

But before you read that, I'm asking that you consider our children's education and, inherently, support and training of the people working most closely with those children, as paramount to the foundation of a healthy society. The divisions we have seen in our country and our state are a direct result of a lack of educated thinking. I don't mean that people should have the same politics as I do, but this abhorrent and viral spread of misinformation, could be mitigated by people learning how to *\*think\** critically. Among so many documented benefits of quality education are the ability to stretch one's mind, to embrace new ideas, and to make rational judgments rather than reactionary, fearful ones. I thank you sincerely for considering enhancing all aspects of support for educating ALL Oregonians. Please continue to read the letter below.

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Respectfully,

Michelle Supelana- Mix

Secretary of Transportation, Ashland School District #5

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Stephen Browne  
OSEA Member, Waldport, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Alison Bowden  
OSEA Member, Corvallis, Ore.

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Catherine McMaster

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Christine Chorazy  
OSEA Member, Scotts Mills, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Crystal Duncan

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Fiona Caccese

OSEA Member, Columbia City, Ore.

### **Quality Education for Oregon Students**

As a member of the Oregon School Employees Association, as well as a parent of 2 Oregon students, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion or more! Students enjoyed the summer experience program offered in the Medford School District which has since been cancelled. Students are still behind academically as well as socially/emotionally due to the COVID setbacks.
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Jes Marsh  
OSEA Member, Medford, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Tammy Washington  
OSEA Member, Hammond, Ore.

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Tammy Washington

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Erin Tichenor Tichenor

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Erin Tichenor Tichenor  
OSEA Member, Carlton, Ore.

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Erin Tichenor Tichenor

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Deni Goodwin  
OSEA Member, Talent, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Amber Williamson

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Reba Crawford-Hayes  
OSEA Member, Ashland, Ore.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Dasa Kalstrom  
OSEA Member, Portland, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Marie Sexton

OSEA Member, Cottage Grove, Ore.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Rosie Salinas Hudock  
OSEA Member, Hubbard, Ore.

**Fund our schools!**

As a school district employee, I'm asking you to fund key elements of Oregon's education system:

- Maintain current service levels with \$10.3 billion in funding
- Pass the wage differential for classified staff working in Special Education.

Students need adequate school services and schools need to retain personnel. It is harder than ever to work in education. Mental health, behaviors, crowded classrooms and staffing turn over are all gutting employees. Give us the financial tools to address these issues.

Thank you,

Jennifer Volem

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Emma Fery  
OSEA Member, Stayton, Ore.

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Daisy Pimentel  
OSEA Member, Bandon, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Jessica Loker  
OSEA Member, Dayton, Ore.

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. I am a Special Education Assistant (Level 2) in the Lake Oswego School District. Although I have had training in strategies to de-escalate students, many of my co-workers have not. This can lead to injuries for employees and prolonged escalation for students that are most vulnerable. I have been hit, kicked, spit on, and bitten. I am lucky I have only been to the ER once for a mild concussion and follow up physical therapy for an injury from the same incident. I did not miss a day of work. These situations are even more frequent now than when I started. We are dealing with a lot of children that just don't have the skills to regulate their behavior. It is getting harder to do my job and feel valued by the state.

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. I am a Special Education Assistant (Level 2) in the Lake Oswego School District. Although I have had training in strategies to de-escalate students, many of my co-workers have not. This can lead to injuries for employees and prolonged escalation for students that are most vulnerable. I have been hit, kicked, spit on, and bitten. I am lucky I have only been to the ER once for a mild concussion and follow up physical therapy for an injury from the same incident. I did not miss a day of work. These situations are even more frequent now than when I started. We are dealing with a lot of children that just don't have the skills to regulate their behavior. It is getting harder to do my job and feel valued by the state.

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Suzanne Slauson

These situations are even more frequent now than when I started. We are dealing with a lot of children that just don't have the skills to regulate their behavior. It is getting harder to do my job and feel valued by the state.

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Suzanne Slauson

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. I am a Special Education Assistant (Level 2) in the Lake Oswego School District. Although I have had training in strategies to de-escalate students, many of my co-workers have not. This can lead to injuries for employees and prolonged escalation for students that are most vulnerable. I have been hit, kicked, spit on, and bitten. I am lucky I have only been to the ER once for a mild concussion and follow up physical therapy for an injury from the same incident. I did not miss a day of work. These situations are even more frequent now than when I started. We are dealing with a lot of children that just don't have the skills to regulate their behavior. It is getting harder to do my job and feel valued by the state.

- In the final state budget, we need these core policies and investments to provide a quality education SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Robert Hewlett  
OSEA Member, Eugene, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Antonio Martinez-Montavon  
OSEA Member, Ashland, Ore.

We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Kristin Smith  
OSEA Member, Portland, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Holly Pershall

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Priscella Dunham

**I support quality education for all Oregon students**

I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Jason Herring

In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Andrea Strauss  
OSEA Member, Portland, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Andrea Strauss

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

William Newman  
OSEA Member, McMinnville, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Roxanne Stevens

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Maureen Ogilvie

OSEA Member, Cannon Beach, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Alice Breneman  
OSEA Member, Hubbard, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Kammi McQuesten

OSEA Member, Beaverton, Ore.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Ashlie Crombie

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Megan Aldrich

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Margaret Bertucci  
OSEA Member, Hillsboro, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Wyatt Mann

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Indigo Kerr-Harding  
OSEA Member, Portland, Ore.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Samantha Bering  
OSEA Member, Clackamas, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Val Pederson

OSEA Member, Oakridge, Ore.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Tabby Walker

### **I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Josh Lane  
OSEA Member, Corvallis, Ore.

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Jill Banks

OSEA Member, Portland, Ore.

**I support quality education for all Oregon students**

As a member of the Oregon School Employees Association, I support quality education for all Oregon's students - from early childhood through K-12 to higher education.

Please prioritize state investment for the following bills under consideration in your committee. Our schools need these funds to support existing programs for students, because they need us now more than ever for their social, emotional, behavioral, physical and academic health.

Classified employees support student needs every day. We deserve basic worker rights - like Just Cause protection, equal access to unemployment insurance (UI) benefits and critical provisions to mitigate on the job injury - including access to individual education plans and de-escalation training. In the final state budget, we need these core policies and investments to provide a quality education experience for all Oregon's students and families every day:

- SB 283:
  - Just Cause for classified employees (no fiscal impact)
  - 20% Salary differential for those classified employees who support special education
  - Study on minimum salaries
- SB 489: Access to Unemployment Insurance for Classified Employees
- HB 5015: Full current-service level K-12 State School Fund investment \$10.3 billion
- HB 3198: Culturally appropriate early childhood literacy programing

Thank you for all that you do and for the opportunity to submit my comments.

Sincerely,

Lynn Macbeth  
OSEA Member, Westfir, Ore.
