

Submitter: Gary Rondeau

On Behalf Of:

Committee: Joint Committee On Ways and Means

Measure: SB5506

Today, when Mississippi River is almost dry because of our climate neglect, it is past time to

support full funding for climate legislation to address the threat to our and our children's health and safety, as well as to leverage newly available federal funding.

Be sure to pass SB 530, SB 522 and HB 2998 to strengthen and modernize Oregon's climate goals, create jobs, and store more carbon on Oregon's working and natural lands.
