

Submitter: Zoe Tyvand
On Behalf Of: cascadesacademy eco club
Committee: Senate Committee On Rules
Measure: SB85

I support senate bill 85 because factory farms are very bad. Factory farms are linked to water and air pollution as well as land degradation. Farm factories also use important/valuable resources. "Animals on industrial farms endure unimaginably cruelty, some in enclosures are so crowded they can't turn around". Some of the animals never even get to see sunlight. Raising this many animals in one confinement has a significant impact on the environment furthermore factory farms have a big negative effect on the earth and directly impact climate change. The animals are subjected to confinement and are forced to do things for human benefit. All these things are bad for the environment and harmful to animals. Please take shutting down factory farms into deep consideration. Thank you.
