

Submitter: Richard Nowacki  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB3414

Dear House Committee on Rules Members,

I believe that this proposal is reckless. It would damage not only natural resources, but cultural resources. Portland and other areas like it are already wiping away their beautiful historical buildings and allowing bad elements to fester, ultimately destroying livability, and the very cultural gathering centers that have made it appealing to begin with. I oppose this measure because it would further ruin the livability of the area and erode the cultural landmarks, which tell the story of a community, generation after generation.
