Committee: Joint Committee On Transportation

Measure: SB422

I have been a motorcycle rider for roughly 4 years now and enjoy our immensely beautiful and beloved outdoors scenery throughout the year. I can't recall how many times during rush and traffic jams have had close calls of getting rear ended by car drivers almost ALL the time. Having the ability to be capable of lane filtering is incredibly useful to save lives, and reduce emissions on the road as motorcycle riders would be moving on a slow steady stream continuously. Furthermore. Distracted driving has been on the rise for quite some years, which incredibly increases the odds of fatal accidents on the road. I completely support this bill and I hope you as well supported.
