

Submitter: Sidney Spevak

On Behalf Of:

Committee: House Committee On Rules

Measure: HB3414

Dear Representatives,

I heard about this bill and I worried because I like animals and if you let people cut down all the trees to make houses, it will destroy mother nature a little bit more and animals won't have places to live. Please build houses in a way that keeps trees in our neighborhood to keep us cool during heat waves, and gives animals a place to live too.

I'm counting on you to make things right. And I'm sure I'm not alone.
