

Submitter: Ned Thanhouser

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

I am an avid motorcycle rider and support SB422A. A study by the University of California shows when lane sharing is used it reduces the level of injury to riders in high density traffic situations. It is commonplace internationally and several US states have moved to allow this procedure under certain conditions. Please vote yes to bring this safety oriented bill to the legislature for a vote. Thank you.
