

Submitter: Elizabeth Bacon
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: SB422

Please pass the SB422 bill! Allowing motorcycles to travel between lanes of traffic when certain conditions exist will benefit both riders and other vehicles on the road by providing for more efficient passage of all vehicles. It provides for a more positive environmental impact by encouraging efficient motorcycling, and may help shift general population behaviors towards the good commuting option that is motorcycling. I lived in Australia for a time, where they already have lane filtering laws; I greatly appreciated having that ability to make me a more efficient city commuter, and I never experienced any unsafe conditions due to exercising this ability. Let's get this positive change underway in Oregon!
