

Submitter: Richard Ault

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

Lane filtering is safer for motorcycles as it takes them out of dangerous situations of sitting behind cars & risking getting run into or over . It also avoids a motorcyclists getting overheated from sitting in traffic while it's hot outside . Most motorcycles are air cooled & are not getting cooled while sitting in traffic . I've been riding motorcycles for 42 years in Oregon & support lane filtering as a choice if you chose too .
