

Submitter: Noah Church

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

Motorcyclists like myself are, by nature of the weight and structure of the vehicle, accepting far more danger to our own lives and posing far less risk to the lives of others when we ride motorcycles versus drive cars. Giving us the legal freedom to navigate between lanes will allow us to better protect our own lives, help traffic move more efficiently, and prevent rear end collisions that are currently out of our control.
