

Submitter: Frederick DeOgny

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

Hi – I'm 64, ride a motorcycle and support this bill. I'm work in management for an international company. Based on my experience, the US is far behind the rest of the world in supporting and fostering economical transportation. This bill could help motivate people to get out of their cars and on to a smaller, more efficient vehicle and, for me, feel safer doing so. My wife's cousin, Eric Cunningham, was killed in 2005, in stalled I-5 traffic, hit from behind by a truck. He might not have died that day had he had the right to utilize the road as this bill would allow. Thank you.
