

Submitter: Mary McMurray
On Behalf Of:
Committee: House Committee On Rules
Measure: HB3414

As a thirty-plus year resident of Portland, and professional consultant for architectural history, I am very concerned to see the proliferation of poorly-designed and dominating buildings in our city. This bill will do NOTHING to alleviate the community suffering from lack of any housing for the tent dwellers on our streets. It will adversely affect the historic presence of older structures, and decimate more of our tree canopy. I can see no benefit from this bill except for the developers and their friend in government. Thank you for your consideration.
