Measure: HB3382

Submitter: Laura Dorbuck
Committee: Joint Committee on Transportation
Measure: HB 3382

I oppose HB 3382

As a 52 year resident of Charleston I value our estuary for it's recreational uses and it's beauty.

The South Slough National Estuarine Research Reserve here in Charleston provides recreation, scientific study, preservation of an undeveloped estuary and many local jobs. It is a valuable asset to our area.

Allowing the port to circumvent our state and local land use laws and to potentially negatively impact the South Slough National Estuarine Research Reserve is a bad idea all around.

Public input into how our local resources are used is important to this Oregonian.

Please do not support this bill.
