

Submitter: Kristen Minor

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB775

Soil & Water Conservation Director is an important, but low-profile position. This bill makes sense because the restrictions on who can run for the position are especially challenging for places such as Multnomah County, with large urban populations. As a Multnomah County resident, I strongly support the smart compromise this bill represents. Please pass this bill to address the hurdles that Multnomah County Soil & Water repeatedly deals with in filling the Director position.  
Thank you.
