

Submitter: David Looney

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB775

I live in Multnomah County, and see the current eligibility rule stating a citizen must own 10 acres in order to run for soil & water district board director as one that unfairly discriminates against thousands of tax paying urban residents. I look forward to the senate updating the statute so that counties such as mine can be represented by qualified candidates who may or may not own property.
