EFFECT OF AMENDMENT:

No amendment.

BACKGROUND:

The term "peer-to-peer car sharing" refers to a type of lending or collaborative consumption in which a vehicle owner shares their vehicle with another individual for an agreed-upon period of time. Such arrangements can be created between individuals (the vehicle owner and the vehicle driver) or may include a car club or peer-to-peer car sharing company through a phone application. The peer-to-peer company option also has two general options: fleet-based car sharing, where the company owns the fleet of vehicles that are listed on the app platform; or companies that simply facilitate transactions between vehicle owners and vehicle drivers.
