

Submitter: Keevin Bybee

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB4070

I am a family physician who cares for the most vulnerable of our citizens. on a daily basis i see the long term life, health, and career consequences of poorly attended medical care. one of the best ways that we can invest in our fellow citizens is to reduce the barriers to accessing health and education. school based health centers are an ideal model to keep kids healthy AND at school. Please increase the amount of state grants to school based health centers so that we can have a thriving populace
