On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: SB1503

You know this is a terrible piece of poorly written garbage. I need not be eloquent--- its garbage and you know why its being pushed at us. Anyone wanting this is ignorant of the facts or has an agenda. First, no so called 'gun laws' will ever stop a human from becoming mentally unstable enough to kill others. If not with guns then any other methods. Back east, pressure cookers were used as bombs! In all states with open and/or concealed carry, the crime rate went down. I realize this is falling on deaf ears. You can label any gun an 'assault weapon' and try to change capacities, stock styles etc but thats just to try and change ignorant citizens minds into thinking they are war devices instead of also hunting or just plain shooting sports and collecting. My family and I were saved from a drug crazed robber because I had a licensed pistol. It YOUR families are ever at gun or knife point and a stranger with a legal weapon saves them---Im sure you will see the point. Even if I agreed that there should be heavier gun control, this new set of rules is so terribly put together that it cant even work. Its a total mess. Just based on that you should not allow this to go as its written. No vote of mine or my friends will go to any politician who supports taking my my right to freedom and protection. You realize that this even turns a police person into a criminal?
