

Submitter: Raudel Perezchica

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB4149

As a taxpayer I want my doctor to be the one to prescribe my medications not a private equity firm. It has come to the point that we are paying more for medication because of the for profit attitude the private equity firms have adopted. Medication should not be out of reach for folks that need it.

Thank you

Raudel Perezchica
