Committee: House Committee On Economic Development and Small Business

Measure: HB4124

I support HB 4124! We are so fortunate to have some stunning historical lodges and art scattered around Oregon. As a native, these pieces of our state history are especially important to me and my children's future. It is important for our state to invest in saving, restoring and preserving these places for ourselves and our future generations. Not to mention the jobs this could create and the increased tourism from within and outside our state.
