

Submitter: Casper Newlin

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4083

I am grateful for the opportunity to be writing in support of the Coal act, HB 4083.

My name is Casper, I'm 12 years old, and I go to school in Portland. I'm young enough that climate change will most definitely have a significant impact on my future, and it is known that coal is a large contributor to climate change. There's alternatives, like renewable energy, so coal isn't something that we need at all. Coal is something that I would love to see be banned worldwide, and Oregon could be a leader, and one of the first places to start.

Thank you for your time,
Casper
