Business IDA opened in 2018

“Being a single mother of four and working since I was 16 years old I never would have ever dreamed or imagined I could own my own business and become self-sufficient.

I now am a real business owner with a growing client list! The IDA program has given me this opportunity.

I can employ my family and actually leave them something to help their future once I am gone. This program has given me a new future as well as a future for my family.”
