

Submitter: David Craig MD

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1537

The Governors plan to add up to 36000 housing units annually for ten years may well be a gross overestimate of the number of affordable units needed. In fact, data appears to show the population in our wonderful state may In fact be decreasing. Attempts to suddenly expand our UGB without further study and input is simply wrong. I would ask our legislators to amend SB 1537 to remove all attempts to expand the States UGB.
