

Submitter: John Eaton

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

I oppose this measure. Continues the government over reach into our communities and school systems. Effectively criminalizing academic choices made by schools in the best interest of their own community and students. Further erodes the public trust in the government and public educational systems by pandering, capitulation and forced indoctrination of ideas unwanted or unneeded by the public for the appearance of inclusion.
