

Submitter: Anthony A Carlin

On Behalf Of:

Committee: House Committee On Economic Development and Small Business

Measure: HB4124

in these times it seems like distancing or even trying to abolish ourselves from the past is the answer, which in most instances is impossible. we all have in common growing up with family, and in every aspect, for all of us, it was completely different, we had no choice in the matter except the experience. what this bill offers is a chance to help preserve, treasure and understand the past, and bring it forward for generations to come. this is getting to share the best part of past time and place with the future of our growing oregon. i support this bill.
