

Submitter: Mike Reinemer

On Behalf Of:

Committee: Senate Committee On Housing and Development

Measure: SB1537

While everybody in recognizes the need for housing the ability to creat it at an affordable price has been severely hampered by Oregon land use rules, the appeal process rules and local permit and building departments being years behind in making any changes to a cumbersome, litigious and very slow system with multiple layers of rules, regulations and requirements that often oppose or at the least creat huge additional costs to achieve what we all agree we need.

Themis bill is not a perfect solution but it will hopefully get us moving in a positive direction to start solving a housing supply and affordability problem that has been years in the making under our current onerous system.

Please support this bill.
