

Submitter: Harriet Cooke

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

I am a retired physician with a masters in public health, and wholeheartedly support this bill. As industry grows and the threat of a regional earthquake looms ever closer, we need all the evidence possible to require industry to move forward in ways that will not create catastrophic risks to the public. Please pass this bill!
