

Submitter: Emily Polanshek

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4044

Esteemed Committee Chair Grayber and members,

I support HB 4044, the Toxic Inhalation Plume Study bill, because we have the right to know the truths about fuel and chemical storage. Denial will not help us protect lives; knowledge can if we make viable plans based on evidence. Please let HB 4044 move forward.

Thank you.
