

Submitter: Laurie King

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4044

My husband and I live in St. John's, right across the river from the tank farms. We are super concerned about earthquake caused toxic inhalations. We all know that a large earthquake will come to Oregon that will cause massive destruction. Please support this study so responsible governments, businesses and non-profits can have enough data to plan ways to ensure safety for us all.

Thank you,
Laurie King
