

Submitter: Anne Castleton

On Behalf Of: public citizen

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure: HB4044

Please move this bill forward. The CEI Hub as it exists now has the potential to cause the most damage in the next (and imminent) large Cascadia Subduction Zone earthquake coming to Oregon. Please support this study so responsible governments, businesses and non-profits can have enough data to plan ways to ensure safety for us all.
