

Submitter: annie capestany

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

I support HB 4044. I am a Neighborhood Emergency Team member in Portland and one of our jobs is to help people prepare so that they can survive an earthquake. HB 4044 would mandate studying the risks related earthquake-induced toxic inhalation. That is very important so that people can properly prepare, especially those in higher risk areas. More information is always good. Please pass HB 4044 so that everyone has accurate information to protect their lives and lungs.
