

Submitter: Blaine Ackley

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4083

My testimony is short and sweet:

Coal and the burning of fossil fuels got us into this climate change mess so why would we want to invest our state's money into companies that are causing the state so many dollars to fight? It makes no sense and should have been done a long time ago.

Blaine Ackley
