

Submitter: Wendy Emerson

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4044

Whether one's position about fossil fuels is that we should be going way beyond what the current policy dictates to phase them out (which is mine), or "drill baby drill", understanding the risks of having millions of gallons of toxic and flammable liquids stored in a liquifaction zone that is nearly adjacent to the most populous parts of the City of Portland seems like something you would want to do.
