Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4083

greetings,

i am writing in support of hb4083- the coal act. i can hardly believe i or anyone else has to give voice to pulling the plug on coal investment but such is the complex web we have all trapped ourselves in. it's not news that the energy sector would not make a dime without public subsidies and yet no one wants to give up there place of perceived economic stability that business as usual provides. i understand. that is why i write asking those that carry my voice in our state to be brave and break with business as usual. it is only a matter of time before the economics of the energy sector shift and those investments that support our state are devalued if they are not changed. that's enough rant

thanx for your time
