

# Data Trends

Public University Data Trends for HB 4125

2/8/2024 House Higher Education Committee

The following data was compiled through publicly available sources that outline trends at Oregon's public universities.

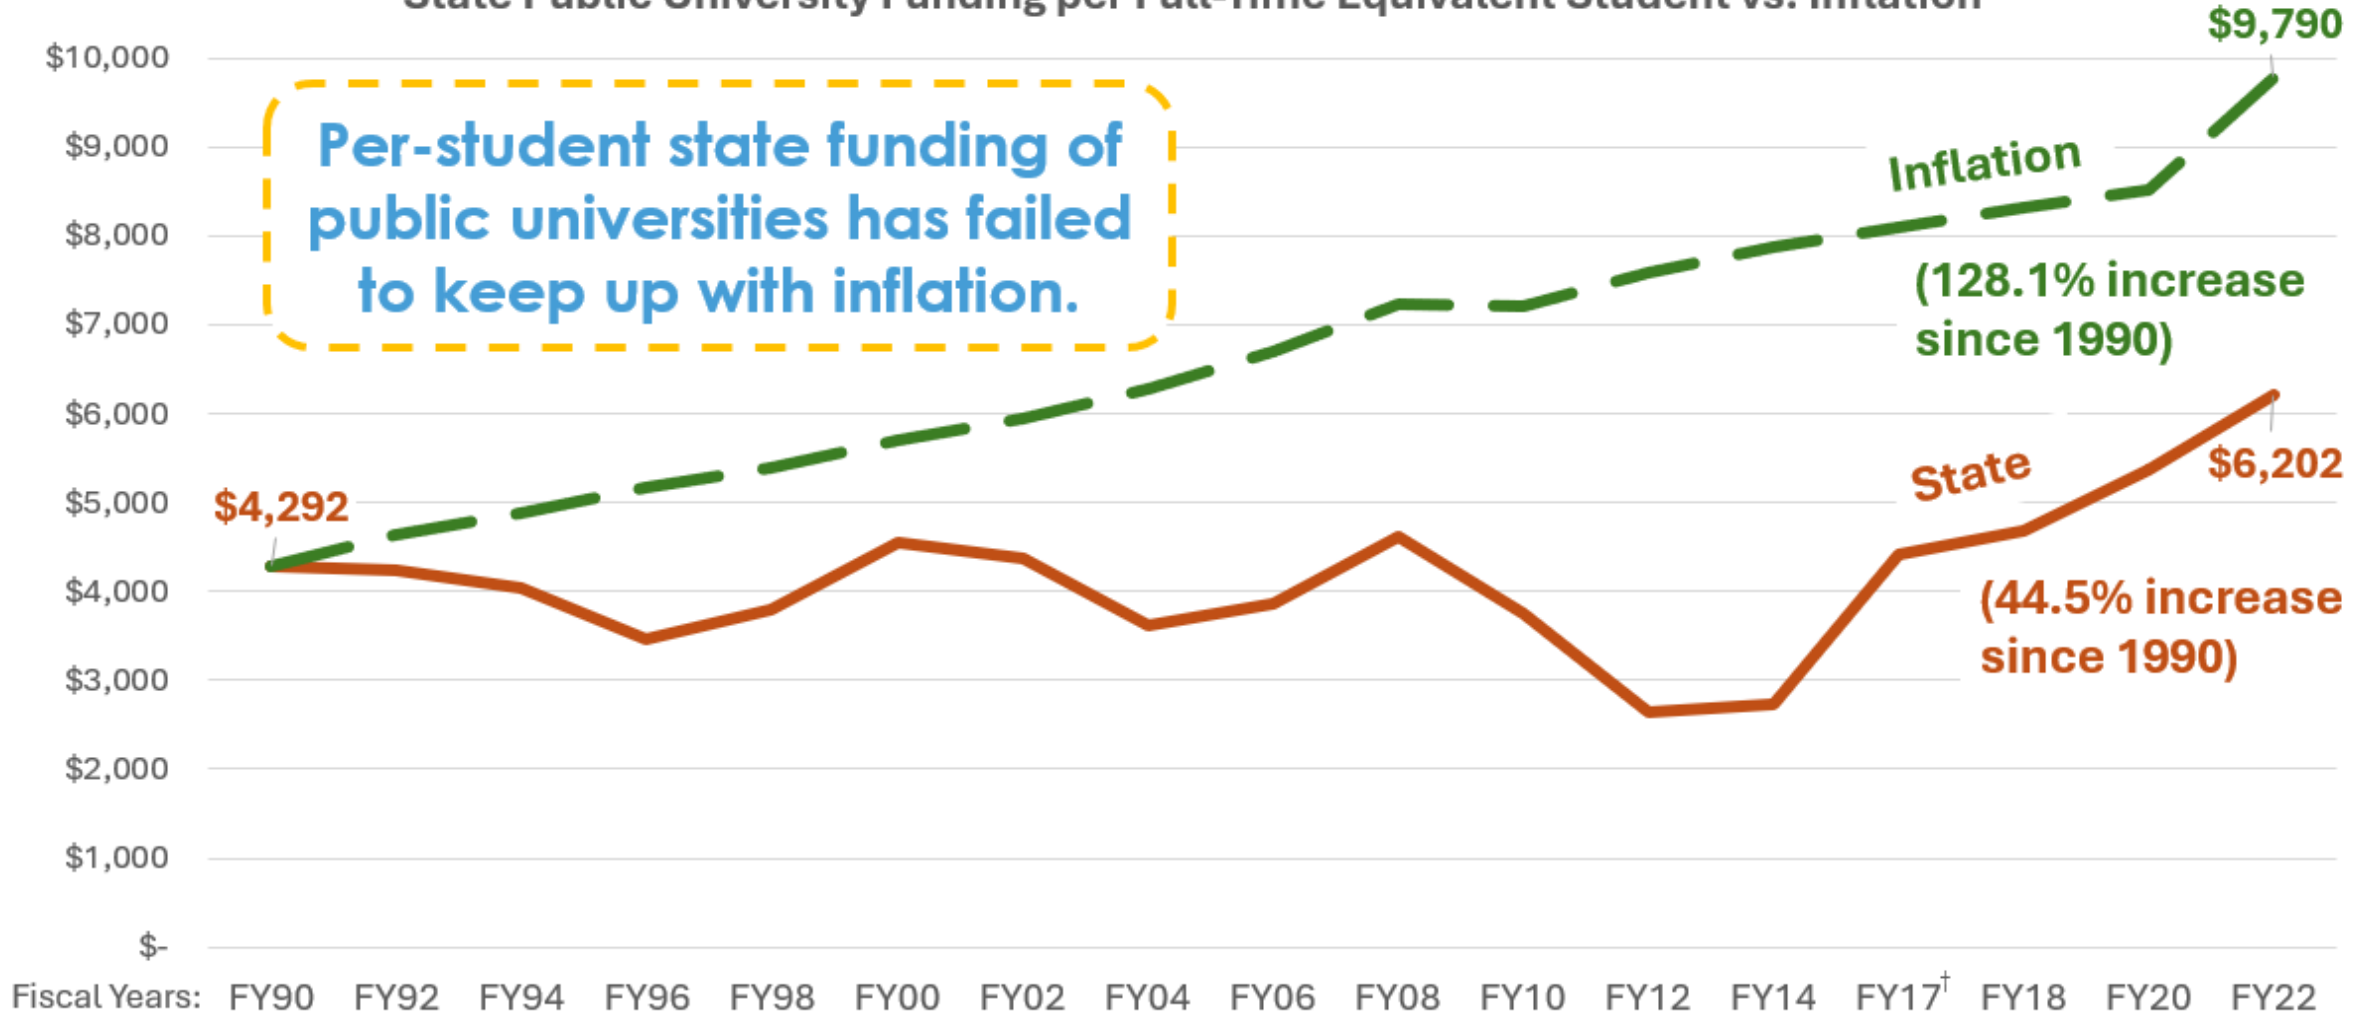

**Notes:**

1. Education appropriations are a measure of state and local support available for public higher education operating expenses and student financial aid, excluding appropriations for research, hospitals, and medical education. Education appropriations include federal stimulus funding.
2. The U.S. calculation does not include the District of Columbia.
3. Fiscal year 2022 net FTE enrollment is estimated for Arkansas and education appropriations for Illinois and Texas include estimated local appropriations.
4. Constant 2022 dollars adjusted by the Higher Education Cost Adjustment (HECA).
5. Adjusted to account for interstate differences using the Cost of Living Index (COLI). The COLI is not a measure of inflation over time.
6. Sector is determined at the institution level using the Carnegie Basic Classification (<https://carnegieclassifications.acenet.edu/>). Baccalaureate/Associate's Colleges and "less-than-two-year" degree-granting institutions not assigned a Carnegie classification are considered two-year institutions.
