

Submitter: Chad Kernutt

On Behalf Of: WE THE PEOPLE

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure: HB4083

Dear Lawmakers,

Please stop attacking our natural energy sector. We need to be an energy dependent and energy producing country and not at the mercy of China where all of our "green energy" production equipment comes from. Not to mention with wind, solar, and hydro you are at the mercy of the weather for the collection of power from these generators. Last time I checked we're not very sunny in the pacific northwest and the liberals out here in this neck of the woods are engaged in dam busting in the name of protecting ecosystems. These are not dependable energy producers and they can not feed the required loads for our power grids which you would know with a little research. Natural gas, coal, nuclear, and fossil fuels are not only dependable sources of energy for us in America but they are big time money producers. When one party rule in the state of Oregon has righteously jacked up our PERS system and put us in serious debt, I would think that divesting from big time money/investment producers would be a fools errand and unwise all for the pursuit of one parties global warming agenda which time and again doesn't pan out and of their beliefs placing science over God who last time I checked controls the weather and has already told us how the end comes about and HE brings the heat folks. If satan can't stop the plan than neither can the democrat party. Please cease and desist from stupid ideas at once. Please vote NO on HB-4083. Thank you.

Sincerely,

Chad Kernutt

Albany, Oregon
