

Submitter: David Simmons

On Behalf Of:

Committee: Senate Committee On Judiciary

Measure: SB1503

SB 1503 is just one more example of an overreaching attempt to infringe on the second amendment masquerading as a "suicide prevention" measure.

If you want reduce suicide in Oregon make a REAL effort to address mental health issues within our community, as the current situation does nothing but overtax our already limited first responders and line the pockets of the manufacturers of NARCAN.

Repeal the decriminalization of drugs on our streets and enforce the laws we have in place now.

I'm a responsible gun owner and if I had the inclination to end my life, it would certainly be with fentanyl and not a bullet.

I'm also a commercial driver who works within the city of Portland and seeing open drug use on our streets, within sight of schools and nothing being done is sickening.

1503 is useless, will do nothing to reduce suicide and is just another attempted on our constitutionally granted firearms rights.

Please reject this sham of a law.
