

Submitter: Lindsey Vogt  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB1583

The description of this bill is SO misleading! Shame on you! No one in their right mind advocates for discrimination, especially in print and program materials for our youth. So, at first glance, why would a reasonable adult oppose it? Yet, a reasonable adult also wouldn't expect the LGBTQ+, detailed sex education, racial and political agendas to be classified in such positive ways to be classified as anti-discrimination.

Stop focusing school hours, materials and funding on issues that divide (calling out the differences). Get back to teaching real content - reading, writing, and STEM. The school is overstepping its role, parents are the teachers of social and moral subjects.
