Of:

Committee: Senate Committee On Veterans, Emergency Management, Federal
and World Affairs

Measure: SB1577

I oppose this bill. I believe that voting is a privilege, and not a right. A person that wants to vote should be able to get himself/herself registered to vote. They should take the initiative and go through the proper steps for registration. Its not at all difficult, and any reasonably educated person can do it. If they can't figure it out, they have no business voting!

I oppose all forms of automatic voter registration. I believe this opens the door to corrupted voter rolls and opens the door to allowing undocumented aliens being able to vote.

Voting should be open to all citizens that take the time and initiative to go through the proper steps to register themselves.

I would prefer going back to voting in person, as we used to do it. That would mean that those that really have an interest in the democratic process would show up and vote.

Vote by mail is rife with fraud. This has been proven by the corrupted voter rolls in our State.

Thank you.
