

Submitter: Gordon Lyford

On Behalf Of: Space and time dilation

Committee: Senate Committee On Veterans, Emergency Management, Federal and World Affairs

Measure: SB1548

I am in favor of year around standard time, ie 12 months a year. Daylight savings time makes no sense, is a burden, is dangerous, and is a health hazard. We need standard time year around. My late wife was strongly in favor of year round standard time, and I wish that she could have lived to experience standard time.

Please approve SB 1548 to improve our lives. The Sun and Earth manage time just fine. Humans cannot improve on standard time. Standard time should be the standard. Live with it and enjoy standard time.

Thank you-
