

Submitter: Kristin Gross

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB1572

Expanding WES rail service to Salem would be incredibly beneficial. It will help decrease vehicle emissions with so many people able to commute to Salem without a car. It would also expand car free recreation opportunities for people looking to get out of the city to ride their bikes.

I hope one of the things that is studied is a way to make sure this is an affordable alternative to driving.
